

Chastain Arts Center - Supply List

iPhone Photography / Marie Matthews

Camera

* camera-equipped iOS device --- an iPhone, iPod touch with a camera, or an iPad2 --- running iOS4.2 or later (*) . If you have an iPhone and an iPad, please feel free to bring both devices. The iPhone has the best camera, but the iPad is easier on the eyes for editing.

Apps

You can get the apps from the AppStore. The following apps will allow you to explore a wide range of possibilities in the workshop.

- * Camera+
- * Hipstamatic
- * ProHDR
- * Iris
- * Snapseed
- * Touch Retouch
- * Dramatic B&W
- * Superimpose

If you are bringing an iPhone and an iPad, I would recommend that you also pick up a copy of PhotoTransferApp so that you can move your pictures from one device to the other.

* --- Note: You are most likely already running iOS4.2 or above. If your iPhone is more than two years old, I would recommend going to "Settings" and checking to see what version you are running. iOS4.2 was released in November 2010 and is compatible with the iPhone 3G, iPhone 3GS, iPhone4, iPod Touch from 2009 and later, and iPad (all versions).
